

HUMA BURST® PRILLED

CONTAINS NON-PLANT FOOD INGREDIENTS

Total Humic Acid (HA) and Fulvic Acid (FA) 60.00%-70.00%
(Analysis using the Colorimetric Method)

Derived from: Oxidized Leonardite

Other Methods:

Total Humic Acids (HA) 35.00%-40.00%
(Analysis using the HPTA or ISO 19822 Method)

Total Humic Acids (HA) 30.00%-35.00%
(Analysis using the CDFA Method)

DIRECTIONS FOR USE

- Designed to be applied to the soil. • HUMA BURST® PRILLED adds naturally occurring materials containing humic acids to soil that may enhance plant micronutrient availability and uptake and should be applied when soil analysis identifies the need and proper rate of application for this product. • Best results will be obtained when application is concentrated in the active root zone or when applied directly to the soil followed by a shallow cultivation.
- Can be applied alone or in combination with other granular fertilizers. • Apply HUMA BURST® PRILLED by broadcast whether through air or ground machine. • HUMA BURST® PRILLED can be applied to all soil types for ornamentals, lawns, gardens and landscapes. • Application timing, intervals and rates may vary according to individual crop requirement, stage of development, available nutrient levels in the soil, and overall nutritional status of the crop. • Applications can be made as often as every 30 days as needed. • Soil moisture is required for maximum bioactivity. If soil is dry, moisture should be provided by irrigation. • Consult your local HUMA GRO® representative or other agricultural specialist for crop-specific recommendations.

This product is intended as a supplement to a regular fertilization program and will not, by itself, provide all the nutrients normally required by agricultural crops.

STORAGE AND DISPOSAL:

Keep product in original bag. Do not transfer into food or drink containers. Always dispose of bag in accordance with local, state and/or federal regulations.

METHOD OF APPLICATION

SUGGESTED RATE

	Field Crops	Tree or Vine Crops
